ANSWERS TO QUESTIONS

1. A T-account has the following parts: (a) the title, (b) the left or debit side, and (c) the right or credit side.
2. Disagree. The terms debit and credit mean left and right respectively.
3. Jason is incorrect. The double-entry system merely records the dual effect of a transaction on the accounting equation. A transaction is not recorded twice; it is recorded once, with a dual effect.
4. Sandra is incorrect. A debit balance only means that debit amounts exceed credit amounts in an account. Conversely, a credit balance only means that credit amounts are greater than debit amounts in an account. Thus, a debit or credit balance is neither favorable nor unfavorable.
5.
 - (a) Asset accounts are increased by debits and decreased by credits.
 - (b) Liability accounts are decreased by debits and increased by credits.
 - (c) Revenues, Share Capital—Ordinary, and Retained Earnings are increased by credits and decreased by debits. Expenses and Dividends are increased by debits and decreased by credits.
6.
 - (a) Accounts Receivable—debit balance.
 - (b) Cash—debit balance.
 - (c) Dividends—debit balance.
 - (d) Accounts Payable—credit balance.
 - (e) Service Revenue—credit balance.
 - (f) Salaries and Wages Expense—debit balance.
 - (g) Share Capital—Ordinary—credit balance.
7.
 - (a) Accounts Receivable—asset—debit balance.
 - (b) Accounts Payable—liability—credit balance
 - (c) Equipment—asset—debit balance.
 - (d) Dividends—equity—debit balance.
 - (e) Supplies—asset—debit balance.
8.
 - (a) Debit Supplies and credit Accounts Payable.
 - (b) Debit Cash and credit Notes Payable.
 - (c) Debit Salaries and Wages Expense and credit Cash.
9.
 - (1) Cash—both debit and credit entries.
 - (2) Accounts Receivable—both debit and credit entries.
 - (3) Dividends—debit entries only.
 - (4) Accounts Payable—both debit and credit entries.
 - (5) Salaries and Wages Expense—debit entries only.
 - (6) Service Revenue—credit entries only.
10. The basic steps in the recording process are:
 1. Analyze each transaction for its effect on the accounts.
 2. Enter the transaction information in a journal.
 3. Transfer the journal information to the appropriate accounts in the ledger.

Questions Chapter 2 (Continued)

11. The advantages of using a journal in the recording process are:
 - (a) It discloses in one place the complete effects of a transaction.
 - (b) It provides a chronological record of transactions.
 - (c) It helps to prevent or locate errors because the debit and credit amounts for each entry can be easily compared.
12.
 - (a) The debit should be entered first.
 - (b) The credit should be indented.
13. When three or more accounts are required in one journal entry, the entry is referred to as a compound entry. An example of a compound entry is the purchase of equipment, part of which is paid in cash and the remainder is on account.
14.
 - (a) No, business transaction debits and credits should not be recorded directly in the ledger.
 - (b) The advantages of using a journal are:
 1. It discloses in one place the complete effects of a transaction.
 2. It provides a chronological record of transactions.
 3. It helps to prevent or locate errors because the debit and credit amounts for each entry can be easily compared.
15. The advantage of the last step in the posting process is to indicate that the item has been posted.
16.

 - (a) The entire group of accounts maintained by a company, including all the asset, liability, and equity accounts, is referred to collectively as the ledger.
 - (b) A chart of accounts is a list of accounts and the account numbers that identify their location in the ledger. The chart of accounts is important, particularly for a company that has a large number of accounts, because it helps organize the accounts and define the level of detail that a company desires in its accounting system.

Questions Chapter 2 (Continued)

- 18.** A trial balance is a list of accounts and their balances at a given time. The primary purpose of a trial balance is to prove (check) that the debits equal the credits after posting. A trial balance also facilitates the discovery of errors in journalizing and posting. In addition, it is useful in preparing financial statements.
- 19.** No, Joe is not correct. The proper sequence is as follows:
- (b) Business transaction occurs.
 - (c) Information entered in the journal.

- 20.** (a) The trial balance would balance.

BRIEF EXERCISE 2-4

The basic steps in the recording process are:

1. Analyze each transaction. In this step, business documents are examined to determine the effects of the transaction on the accounts.
2. Enter each transaction in a journal. This step is called journalizing and it results in making a chronological record of the transactions.
3. Transfer journal information to ledger accounts. This step is called posting. Posting makes it possible to accumulate the effects of journalized transactions on individual accounts.

In the first transaction, bills totaling €6,000 were sent to customers for services performed. Therefore, the asset Accounts Receivable is increased €6,000 and the revenue Service Revenue is increased €6,000. Debits increase assets and credits increase revenues, so the journal entry is:

Accounts Receivable	6,000	
Service Revenue		6,000
(Bill customers for services performed)		

The €6,000 amount is then posted to the debit side of the general ledger account Accounts Receivable and to the credit side of the general ledger account Service Revenue.

In the second transaction, €2,000 was paid in salaries to employees. Therefore, the expense Salaries and Wages Expense is increased €2,000 and the asset Cash is decreased €2,000. Debits increase expenses and credits decrease assets, so the journal entry is:

Salaries and Wages Expense	2,000	
Cash		2,000
(Salaries paid)		

The €2,000 amount is then posted to the debit side of the general ledger account Salaries and Wages Expense and to the credit side of the general ledger account Cash.

(a) The stakeholders in this situation are:

- ▶ Sara Rankin, assistant chief accountant.
- ▶ Users of the company's financial statements.
- ▶ The Hokey Company Ltd.

(b) By adding €1,000 to the Equipment account, that account total is intentionally misstated. By not locating the error causing the imbalance, some other account may also be misstated by €1,000. If the amount of €1,000 is determined to be immaterial, and the intent is not to commit fraud (cover up an embezzlement or other misappropriation of assets), Sara's action might not be considered unethical in the preparation of interim financial statements. However, if Sara is violating a company accounting policy by her action, then she is acting unethically.

(c) Sara's alternatives are:

- 1. Miss the deadline but find the error causing the imbalance.**
- 2. Tell her supervisor of the imbalance and suffer the consequences.**
- 3. Do as she did and locate the error later, making the adjustment in the next quarter.**

- **The impact of a switch to IFRS on U.S. laws and regulations**
- **The impact on companies including changes to their accounting systems, contractual arrangements, corporate governance, and litigation**
- **The issues involved in educating accountants, so they can prepare statements under IFRS**
